Gas Detection & Ventilation Control System

MerlinGuard Product Overview

The MerlinGuard is a gas detection panel designed by American Gas Safety (AGS) to be used with up to sixteen (16) AGS TFT detectors. It is intended for use in spaces that require either refrigerant, toxic or combustible gas detection and provides a pre-programmed control panel including features such as fan control options, alarm damper control, and connectivity to Building Management Systems (BMS).

The panel has four output options for pre-alarm and high-alarm conditions, and contains a 0-10V output that can be utilized by the BMS or for fan control via VFD.

The MerlinGuard is a compact and versatile solution for gas detection in various applications. Please contact AGS or your local representative for further information.

General	
Model:	MerlinGuard Controller
Capacity:	Up to 16 channels per controller unit.
Size: (H x W x D)	7.08 x 10.03 x 3" (180 x 255 x 77 mm)
Housing Material:	ABS Polylac - PA765. / UL 94 V-1
Mounting:	Indoor Use - Wall Mounting
Weight:	1.3kg (2lb 13.85oz)
Display:	4.3" TFT Touch Screen
Visual Indicators:	TFT visual. Green: Normal; Yellow: Pre-Alarm; Amber: Alarm Delay: Red: Alarm Relay Outputs On/Off / Gas Detection Status.
Audible Alarm:	>70dB @ 3.28ft (1m). Quiet conditions.
Buttons:	Common for Silence/Reset operation.
Power Consumption:	14.5W max.
AC Power:	100-120V~ 50/60Hz
Internal Fuse:	T3.15A L250V
Relay Output:	Volt Free Relay Outputs x4 (non-latching) / NO/COM/NC 6A @ 120V~ User configurable – energised/de-energised, time delay / 24 VDC switching.
Common Output:	24 VDC Permanent / 0-10 VDC Variable.
Ingress Protection:	IP64 / NEMA 4 (See manual for further information)
Operating:	-10 ~ 50°C / 14 ~ 122°F 30 ~ 80% RH (non-condensing)
Storage:	-25 ~ 50°C / -13~122F° up to 95% RH (non-condensing)
Typical Wiring	Power & Relay: ~#18-12AWG Detector: #12-18AWG Power Pair; #18-22AWG Data Pair Other: #18-22AWG

1. Use the high alarm relay (output 2) to send 120VAC or 24VAC power to the fans to activate them. This design would require two fans. One fan would cover your standby airflow rate, and the second fan would turn on during a gas detected scenario and increase the ventilation rate to the emergency extraction rate defined by ASHRAE of 100X the standby rate. Use ASHRAE 8.9.8.1 to calculate ventilation rate.

2. Use the 0-10V output to signal a VFD control fan, and have it run at a continuous standby rate and ramp up to the emergency extraction rate upon detection. The 0-10V output will send a linear voltage signal to the VFD based on the sensing range of the detector. Find out more

The TFT range of AGS detectors work in combination with the AGS Merlin range of Gas Detection panels and Utility Controllers. The AGSRTFT features an NDIR sensor for industrial and commercial indoor applications. Compact, modern, digital design makes the units aesthetically pleasing and easy to install.

Audible Alarm Beacon

Product Overview

Here is a highly effective way to provide a visual and/or audible indication of an alarm. The combination of alarm and super bright flashing LEDs offer excellent protection for an array of circumstances as they draw attention in a hurry. The sirens and strobes will work in conjunction with our Merlin control panels. For other applications contact American Gas Safety for additional technical information.

Key Features

- Alarm/siren offers 32 selectable sounds and volume control.
- Include high intensity LEDs.
- 8 flash patterns.
- Typical working properties of polycarbonate are -40° to 250°F (-40°C to 121°C).
- Three year guarantee against breakage of polycarbonate in normal use (one year on electro mechanical and electronic components).
- Designed to meet the requirements of IP54.

Technical Specifications

General	Installation
Model	AGSAAB
Operating Voltage	12VDC-24VDC
Operating Current	0.42A@12VDC, 0.22A@24VDC
Operating Temperature	-4°F - 140°F
Volume @1 foot	High 105dB, Low 85dB
8 Flash Patterns	Yes
Strobe Speed Control	No
32 Sounds	Yes
Strobe Only Control	Yes
Sound Only Control	Yes
Alarm Trigger	Trigger on power
Lens Tamper	N.C. 12VDC, 50mA Dry Contact
IP Rating	IP54

AAB-A

AAB-G

Construction

Durable, polycarbonate construction.

Installation

Operating environment temperatures for AGSAAB models -4F to 140F (-20C to 40C).

Electronics

12-24VDC power supply.

Options

✓ Available with amber, green, blue, red, white, lens.

AGSMGFS*

Manual Fan Switch Assembly Comes with Switch, Label, and Single Gang Cover Plate.

*Optional Recommended Product

Product Overview

The MGFS is a manual fan switch designed to be used with the American Gas Safety range of gas detection systems.

The MGFS provides two additional normally open, manually operated contacts to wire in parallel with any of the AGS systems' internal fan relays.

It is most commonly used with the AGS MerlinGuard Refrigerant Detection Control panel to comply with ASHRAE 15 requirements for manual fan activation switch when monitoring for A2L type refrigerants.

For detailed wiring schematic, please see information on the MerlinGuard A2L system.

Main Product Specs

•	
Range of Product	Gas Detection Accessory
Product or Component Type	Selector switch
Device short name	MGFS MerlinGuard Fan Switch
Bezel material	Chromium plated metal
Fixing collar material	Zamak
Mounting diameter	0.9 in (22.5 mm)
Sale per indivisible quantity	1
Head type	Standard
Shape of signaling unit head	Round
Type of operator	stay put
Operator profile	Black standard handle
Operator position information	3 positions +/- 45°
Contacts type and composition	2 NO
Contact operation	Slow-break
Connections - terminals	Screw clamp terminals, <= $2 \times 1.5 \text{ mm}^2$ with cable end IEC 60947-1 Screw clamp terminals, >= $1 \times 0.22 \text{ mm}^2$ without cable end IEC 60947-1
